enTourage eDGe

Worlds First Dualbook!

Smart combination: communicating screens

The enTourage eDGe is a dual-screen, WiFi-enabled electronic device that merges an e-paper screen with an LCD screen for enhanced interactivity. The left side is comprised of a 9.7" diagonal e-paper display, where users can easily read e-books in PDF and EPUB format, draw diagrams and take notes. The right side of the product is a 10.1" diagonal LCD screen for easy Web surfing, email and instant message composition and sending and video watching. This screen also includes a virtual keyboard for convenient typing. These two screens work uniquely together to make content more interactive, such as pulling up pages and images from the e-paper screen in color on the LCD, opening up video links from textbooks or dragging and dropping terms and names from the e-book into a Web browser to easily search for additional information.

The enTourage eDGe is extremely suitable for college situations due to its compatibility with office documents. For example you can open, edit, save and email your word documents!

Available colors:

- Ruby Red
- Glacier White
- Piano Black
- Ice Blue
- Midnight Blue

enTourage eDGe™ Specifications

- Dimensions: 8.25" by 10.75" by 1.0" (closed)
